Erratum

Hardikar PS, Joshi SM, Bhat DS, Raut DA, Katre PA, Lubree HG, Jere A, Pandit AN, Fall CHD, Yajnik CS. Spuriously high prevalence of prediabetes diagnosed by HbA$_{1c}$ in young Indians partly explained by hematological factors and iron deficiency anemia. Diabetes Care 2012;35:797–802

In the print version of the article listed above, in the RESULTS section, the sentence "However, prediabetic and diabetic participants had higher BMI; mean corpuscular hemoglobin (MCH), and MCH concentration (MCHC); and higher erythrocyte distribution width (RDW) compared with those who were normoglycemic ($P < 0.05$ for all)" should read as follows: "However, prediabetic and diabetic participants had higher BMI, lower mean corpuscular hemoglobin (MCH) and mean corpuscular hemoglobin concentration (MCHC), and higher erythrocyte distribution width (RDW) compared with those who were normoglycemic ($P < 0.05$ for all)." In addition, several errors occurred in Table 3. The results and conclusions of the article remain unchanged. The corrected Table 3 appears below. The online version reflects these changes.
